# CROSSBOW ACCESSORIES

{ THE FIRST CROSSBOW STABILIZER IN THE INDUSTRY }

## DM-2

CROSSBOW CAMERA/LIGHT MOUNT

EASILY MOUNTS TO PICATINNY  
SCOPE RAIL

.....  
ALLOWS FOR INSTALLATION OF  
ANY PICATINNY MOUNTED ACCESSORY ON  
YOUR CROSSBOW

**NEW FOR  
2017**

## EQUALIZER SINGLE ARM

## EQUALIZER DOUBLE ARM

### BENEFITS

- Effectively balances front-heavy crossbows
- Reduces felt vibration and noise
- Single or Double arm configurations
- Improves handling, aiming of crossbows
- Easily mounts to picatinny scope rail
- Compatible with picatinny accessories

**LIMBSAVER**  
by SVL SIMS VIBRATION LABORATORY

Comes with black LimbSaver – custom colors available:

Green Orange Pink Blue Red Yellow Purple

# INFINITY STABILIZERS

BASED ON THE INFINITY SERIES STABILIZER PLATFORM, THE DX AND DXH FEATURES SIMS VIBRATION LABORATORY'S BULL BARREL DERESONATOR

## DX SERIES

High Modulus Carbon Fiber

DX 6  Length: 6 inches  
Weight: 7.2 oz.

DX 8  Length: 8 inches  
Weight: 7.5 oz.

DX 10  Length: 10 inches  
Weight: 8 oz.

DX 30 

DX 28 

DX 24 

## DXH HUNTER SERIES

DXH 6  Length: 6 inches  
Weight: 7.2 oz.

DXH 8  Length: 8 inches  
Weight: 7.5 oz.

DXH 10  Length: 10 inches  
Weight: 8 oz.

### BENEFITS

- Three 1-ounce, removable disc weights included allow the DX to be customizable to each shooter's requirements
- The DX and DXH stabilizers include a proprietary, closed-cell material to increase dampening capability within each carbon fiber tube

## INFINITY SERIES

### BENEFITS

This is why the Infinity Series is so special. Whether you opt for the Infinity 7 or the Infinity 11, all offer a tunable dampening system that significantly reduces shot vibration and noise. This is made possible through rock-solid construction, your choice of Mathews Harmonic Dampers and Stabilizers or cutting-edge Limbsaver vibration-reduction technology, and the unique Infinity arms, which can be rotated 360 degrees and placed forward or rear facing. Nothing on the market comes close to the Infinity Series when it comes to innovation and effectiveness. Period.

Something that seems to be somewhat lost on the bowhunting crowd is the option to pick a stabilizer that not only reduces game-spooking shot noise, but also allows for extreme configuration to increase accuracy.

**INFINITY 7**  
Length: 7 inches  
Weight: 5.2 oz. with (1) Harmonic Stabilizer & (1) Harmonic Damper

**INFINITY 11**  
Length: 11 inches  
Weight: 8.6 oz. with (1) Harmonic Stabilizer & (1) Harmonic Damper

Comes with black LimbSaver – custom colors available:

### BENEFITS

MX Series stabilizers utilize cutting-edge Limbsaver vibration-reduction technology to dissipate after-shot, potential game-spooking noise, while multiple length and weight options ensure a perfect match for any hunting rig. As with all KTECH Designs' stabilizers, the MX Series is CNC machined from 6061-T6 aluminum to guarantee durability while ruggedness is further enhanced through the ultra-rigid skeleton design. This unique design severely reduces the wind influence to allow for greater stability during every shot. If you're interested in an unprecedented level of accuracy, you need look no further than the new MX Series of stabilizers.

## TECH SERIES

The extremely versatile Tech Series offerings are available in a litany of sizes and configurations from the Tech 1 to the Tech 12. Each is 100-percent CNC machined from 6061-T6 aluminum and all utilize the vibration dampening technologies found in Mathews Harmonic Stabilizers and Harmonic Dampers.

**TECH 1**  
Length: 2.1 inches  
Weight: 4.6 oz. with Harmonic Stabilizer

**TECH 5**  
Length: 5.6 inches  
Weight: 8.6 oz. with Harmonic Stabilizer  
4.0 oz. with Harmonic Dampers

**TECH 7**  
Length: 7.5 inches  
Weight: 8.6 oz. with 1-Harmonic Stabilizer & 2-Harmonic Dampers

**TECH 3**  
Length: 3.6 inches  
Weight: 5.4 oz. with Harmonic Stabilizer -  
3.0 oz. with Harmonic Dampers

**TECH 5 TWIN**  
Length: 5.6 inches  
Weight: 7.6 oz. with Harmonic Stabilizer  
4.0 oz. with Harmonic Dampers

**TECH 12**  
Length: 11.25 inches  
Weight: 9.8 oz. with 1-Harmonic Stabilizer & 2-Harmonic Dampers

### BENEFITS

Each Tech Series stabilizer port is machined with three grooves to allow for custom damper configurations, meaning each is highly tunable, which is not something found often in the stabilizer world. There is a reason so many veteran bowhunters opt for the noise-reducing and accuracy inducing qualities of the Tech Series - they work.

# BACK BARS & STRING STOPS

{ SUPERIOR BALANCE, ADJUSTABILITY AND SOUND DEADENING BENEFITS }

## MK SERIES

{ If you're looking for a new side bar that is built with a fully adjustable offset design and the ability to add weights for a truly custom experience, look no further than the new MK Series. }

**MK9**

**MK9-SB**

### BENEFITS

Each MK sidebar is designed with a patent pending nine-point. Interlocking feature, that allows for serious customization. Each MK Series offering is 100-percent CNC machine from 6061-T6 aluminum, which results in a nearly indestructible sidebar engineered to aerospace specs. Additional features include a built-in quick disconnect and the option to choose between the MK9 (knuckle only) or the MK9-SB (knuckle & bar).

## KSB AND RS SERIES

{ One component of all bows that is guaranteed to make noise during every shot is the string, which is why the KSB Series of String Stop Brackets and RS Dampeners are so crucial to overall bow performance. }

**KSB1**

**RS1**  
Fits 5/16" Rod

**RS2**  
Fits 3/8" Rod

**KSB 1R**

**RS1**  
Fits 5/16" Rod

**RS2**  
Fits 3/8" Rod

**KSB SIDE BAR**

### BENEFITS

Each utilizes Mathews Harmonic Stabilizers and Harmonic Damper Technology or Limbsaver Dampeners, along with full adjustability to ensure proper tuning. A host of different models offer to meet further individual preferences from the simple but effective KSB 1R or RS1 to the Side Bar, which both offer serious bow balance, tunability, and of course, sound deadening qualities. True to KTECH form, each KSB is built upon a foundation of quality materials and machining to ensure that your stabilizer will outlast your new bow by years. If that isn't enough, each KSB Series Stabilizer is available with or without a carbon rod, string bumper, and stud mounting kit.

Comes with black LimbSaver – custom colors available:

# BOW MOUNT ACCESSORY RAIL

ALLOWS YOU TO ATTACH YOUR FAVORITE CAMERA OR ACCESSORIES  
TO YOUR BOW WHILE KEEPING THE BENEFITS OF YOUR STABILIZER.

## ROUND STABILIZER ACCESSORY RAIL

- Fits existing 3/4" diameter stabilizer
- Fits KTECH Infinity, DX and new DXH Series stabilizers
- Designed for accessories that mount to a Picatinny style base
- Mount can be rotated for increased versatility
- Black hard anodize

## UNIVERSAL MOUNT

- Fits existing stabilizer
- Designed for accessories that mount to a Picatinny style base
- Mount can be rotated for increased versatility
- Black hard anodized

## ACCESSORY RAIL

MOUNTED DIRECTLY TO MX AND TECH SERIES STABILIZER

**NEW FOR  
2017**

## NEW 10 DEGREE DOWN QUICK DISCONNECT

## QUICK DISCONNECT

# MULTI VISE

MULTI-PURPOSE ENGINEERED VISE THAT WORKS WITH CROSSBOWS, COMPOUND BOWS, RIFLES, SHOTGUNS, AR-STYLE OR ANY FIREARM.

**MULTI VISE**

## BENEFITS

- Patent-pending hands-free automatic ball socket w/ adjustable tension locking feature
- Change vise head position without unclamping crossbow, vertical bow or gun
- 360-degree rotation with locking angle
- Optimize angle and vise positions for work-holding
- Non-marring contact pads
- Easy bench or counter-top mounting with "C" clamp or bolts
- Stainless steel and aluminum construction
- Hard anodize coating
- 100-percent designed, engineered, manufactured in the USA

KTECH Designs produces the highest quality target stabilizers, hunting stabilizers, and string stop brackets on the market. This quality is a direct result of KTECH remaining a made-in-the-USA, family owned and operated company, where each product is designed to exceed consumer expectations. To further enhance user experience, everything KTECH produces is 100-percent CNC machined from 6061-T6 aluminum, ensuring the peace of mind serious archers and hunters demand from their equipment.

Several KTECH Designs' products also incorporate Harmonic Dampers, Harmonic Stabilizers, and the Gridlock design brought to you by industry powerhouse Mathews, Inc. or the cutting-edge Limbsaver vibration-reduction technology.

Whether you raise your heartbeat through the approach of a mature whitetail buck in the November woods, or by toeing the line attempting to out-shoot stiff competition, KTECH Designs' products will make it easier to achieve your archery goals.
